LEDButtons

Smart LED Design Solution.

DESIGN

The design of the buttons is smooth and minimalistic. They are only 22 mm in diameter and provide you with a circle of LED light when activated. They are made of stainless steel and can be used as an alternative to your standard on/off electronic touch. You can choose between several different colours, some of them with engraved symbols.

CONSTANT LIGHT

The buttons can not only be used as an electronic button, but also as a decoration on the rim of your tub. By connecting the LED button to a 3-6V outlet, it will provide you with a constant light decoration. Place 3 to 5 buttons in a row on your bathtub with the constant LED light as an alternative to a standard electronic touch panel. It must be seen!

CUSTOMIZED SYMBOLS

Customized symbols are an option.
