

WAVETEC254™

SANITATION SYSTEMS

Disinfect your water naturally

OVERVIEW

- UV light inactivates the DNA of harmful microorganisms such as E. Coli, Cryptosporidium and many others
- UV light destroys 99% of harmful viruses, bacteria, and pathogens without adding to the water any harmful chemicals or smelly, environmental unfriendly gases.
- UV light reduces the use of chemical levels, helps eliminate chloramines and the discomfort of skin and eye irritants.
- UV light won't damage equipment as ozone and salt systems can.
- Low power consumption
