Status Pro

LIGHTING THE WAY

SIMPLE, EFFICIENT AND EFFECTIVE

Status Pro is a simple, efficient and effective lighting system designed to give real-time status of the spa. Status Pro utilizes energy efficient, long lasting LED technology. Status Pro is compatible with all BP system packs and corresponding topside panels. LEDs will be tied to a cabinet-mounted light fitting that the spa owner can use to tell, at a glance, if all is OK with the spa or if something requires their attention.

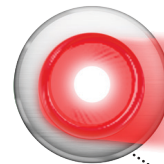

In addition to making world class spa controls, Balboa Water Group strives to ensure the spa experience is reliable, safe and healing. Status Pro is lighting the way.

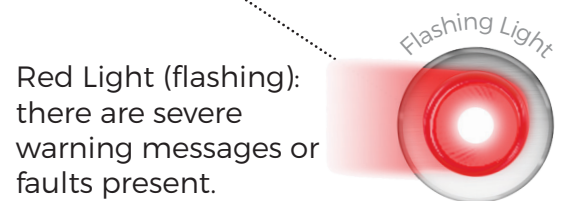

Green Light: spa pack is operational. There are no messages, faults or error codes.

Blue Light: spa pack is operational. There is a reminder and/or information message, and there is no fault or error codes.

Red Light: there are warning messages or faults present.

Red Light (flashing): there are severe warning messages or faults present.
